1921.

A. E. WATERS, Plaintiff,

vs.
ELIZABETH V. WATERS, Defendant.
Now at this day comes the plaintiff herein, by attorneys Ward & Reeves and files his petition and affidavit, alleging, among other things, that defendant Elizabeth V. And it is further ordered, that a copy hereof be published, according to law, in The Hayti Herald, a newspaper published in said County of Pemisecot, for four weeks successively, published at least once a week, the last insertion to be at least fifteen days before the first day of said next November term of this Court.

Near Ft. Worth, Texas, the other night, a band of bandits planned to hold up a train, kill the mail messenger, and rob the mail car. FORMER CITIZEN IS BURNED TO DEATH

Mrs. Lula Longgrear, aged 60 years, mother of Pink Longgrear, the popular traveling salesman for the Dempsey Grocery Co., died last night as a result of severe burns received in the morning while preparing breakfast for her family.

Her husband had used coal oil in lighting the fire and left the can, it was in on the warming oven. Later Mrs. Longgrear accidentally knocked it over while putting more wood in the stove. Fire burst out from the stove and enveloped her in flames. Tearing down a portier nearby she threw it over her head but her clothing was a mass of flames. Her husband and son were badly burned as they tore her clothing from her. Mrs. Longgrear died the same evening and was buried Sunday.

Deceased is survived by her husband and five sons, Pink, Will, Rev. Dell, Frank and Buster.—Lilbourn Herald.

Missouri Cotton Delegates

The Missouri State Board of Agriculture appointed twenty-nine delegates to the annual convention of the American Cotton Association, which convened in Birmingham, Alabama, on October 26, 1921, dealing with production, marketing and cotton tariff questions.

Missouri's 1920 cotton crop in twelve cotton counties was worth \$5,900,000.00.

The Missouri delegates to the Birmingham cotton convention were as follows:

Paul Bestor, E. C. Speer and W. T. Byars, Caruthersville; C. M. E. nes, Marston; Ezra Deem, Hemenway; C. H. Conally, Doniphan; W. T. Bird, Proteem; T. A. Barker, Moody; Mrs. Sarah Cole, Mammoth; George W. Wade, Bakersfield; A. F. Hartwig, Thayer; O. C. Wilkinson, Myrtle; Henry Barnes and Albert Kaich, Quinn; W. B. Wallace and W. T. Canear, Senath; W. H. Stovall, Arbyrd; T. E. Page, Clarkton; R. M. Finney, Kennett; Dr. Floyd Kinsolving, Hornersville; T. W. Back, Holcomb; C. S. DeField, East Prairie; Wilbur Kiser, Gideon; G. T. Hunter, Parma; T. P. Russell, Hayti; W. P. Robertson, Deering; F. S. Bice, Oran; D. O. Parker, Bernie, and E. C. Mohrstadt, Dexter.

Missouri Feed Law

The Missouri Feed Law requires that each bag of all live stock and poultry feeds (including corn, chop, bran and shorts), to be correctly labeled, showing what you are buying, as follows:

"Name or brand of feed; weight; name and address of miller or chief distributor; percentages of protein, fat and fiber; name of each ingredient."

The protection given by the Missouri Seed and Feed Laws applies only to retailers and wholesalers selling within the state. If you buy of them they are required to fully and legally label all farm seeds and seeds or pay the penalty of the law for failure.

If you buy feeds or seeds from outside the state by mail the Missouri seed and feed laws do not apply, and in fact they are utterly helpless to give you any protection whatsoever.

The Missouri State Board of Agriculture says "Buy only legally labeled seeds and feeds—they cost no more, and you can make sure that you are getting what you are paying for."

King Corn in Missouri

Missouri's 1921 corn yields 30.75 bushels upon 6,152,000 acres, or 189,205,000 bushels. The Missouri yield in 1920 was 198,880,000 bushels, and the five-year average was 170,354,000. The yield in 1920 was 32 bushels per acre. Reduction during September totaled 17,167,000 bushels which is the toll paid by farmers from windstorms and heavy rains.

Farmers in Carroll county estimate their corn damage at 15 per cent. Saline 13 per cent, Henry 12 per cent and Boone 10 per cent. While the loss in actual bushels will be great, the damage in quality will be exceedingly severe and much more mouldy, rotten and sprouted corn may be expected than usual.

Fifth in Jersey Cattle

Missouri stands third among all the states in number of pure-bred registered Jersey cattle breeders, and fifth in the number of pure-bred Jersey cattle. With a Missouri owner of pure-bred Jerseys standing second with her cow in her class in production of butter fat in the United States, Missouri, can justly lay claim to being one of the leading dairy states, in so far as pure-bred Jersey cattle are concerned.

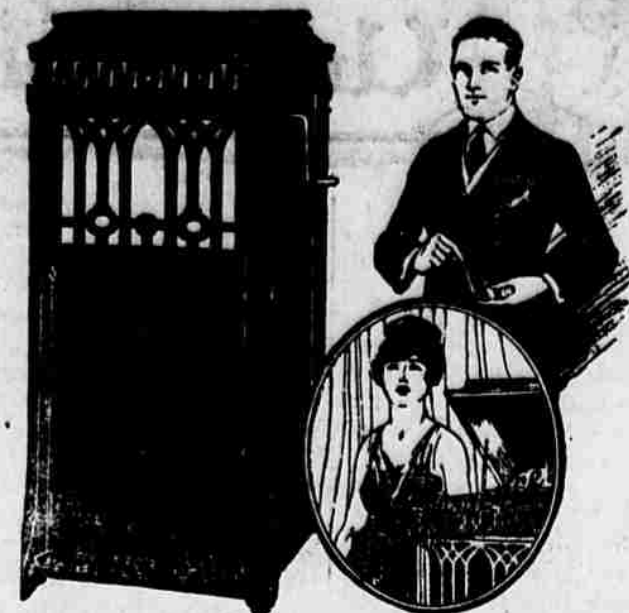

Must Register "Corn Chop"

"Corn Chop" must be registered under the Missouri Feedingstuffs Act, administered by the State Board of Agriculture. There is no charge made for registering feeds in Missouri, and the essential requirements is to tell the truth about the ingredients and feeding value of what is in the bag. All live stock and poultry feeds are covered by this law.

A very enjoyable dance was given by the Phillips-Hudgings Post of the American Legion in the Armory at Caruthersville Halloween night. Music was furnished by the Royal Flush Orchestra. The hall was very tastefully decorated in the form of an old-fashioned barn dance, and was attended by approximately 150 couples. Hayti was well represented, and every one reports a most enjoyable time.

The Ladies Aid of the Methodist church will hold a Christmas Bazaar and serve dinner on Wednesday, December 21st. Details will be announced later.

We Can Prove It

With a dozen New EDISONS

We did prove it,—absolutely and conclusively,—with a single New Edison. You know we did,—from the results of the test made last week at the High School Auditorium, when Miss Amy Ellerman and Miss Vera Barstow, assisted by Calvin Cox compared their singing and playing with its Re-Creation by the New Edison.

We can do it again,—with any other Official Laboratory Model in our store.

Last week's marvelous exhibition was not the achievement of a special New Edison. It was simply a regular performance for any Official Laboratory Model.
